

## NOTICE OF GENERAL RATE INCREASE

**TO:** Valued Customer  
**FROM:** APPS Cargo Terminals  
**DATE:** November 26, 2025

Please be advised that APPS Cargo Terminals will implement a General Rate Increase of **3.25%**, effective on the expiry date of your current rate authority. If your existing rate authority has already expired, the increase will apply no later than **January 1, 2026**.

This adjustment reflects the continued rise in costs directly tied to LTL and TL operations, including but not limited to:

- Significant increases in linehaul expenses driven by higher rail and over-the-road transportation charges
- Rising equipment acquisition and maintenance costs, particularly for trailers, power units, and specialized LTL handling equipment
- Escalating labour and safety-compliance costs across all operating regions
- Increased terminal operating expenses, including warehousing capacity, property taxes, and utilities

While we have implemented process improvements and network optimization to offset as much of these increases as possible, a rate adjustment is necessary to maintain the service reliability, capacity availability, and transit consistency that our LTL and TL customers depend on.

Across our terminal network, our teams remain committed to safe, efficient, and consistent handling of your freight. Their dedication - supported by ongoing facility upgrades and process improvements - ensures that your shipments continue to move through a dependable and well-managed system.

If you have any questions or wish to discuss your specific program, please contact your local Account Manager.

Thank you for your continued partnership and the trust you place in our team. We value your business and look forward to supporting your transportation needs in the year ahead.

Copies of our updated tariffs are available at: <https://www.appsexpress.com/cargo/documents> or hard copies can be mailed upon request.
